Application/Control Number: 10/009,584

Art Unit: 1636

## **Election/Restriction**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method of identifying a compound that modulates a transcriptional response to hypoxia in a cell, said method comprising contacting a cell with the compound, subjecting the cell to hypoxic conditions and assessing a transcriptional response of the cell to the hypoxic conditions.

Group II, claim(s) 8-15 and 24, drawn to a method of identifying a compound that modulates a transcriptional response to hypoxia in a cell, said method comprising determining whether the candidate compound affects the interaction between two transcription factors.

Group III, claim(s) 16-21, drawn to a method of treating a condition characterized by hypoxia in a patient, comprising administering a compound that modifies a transcriptional response to hypoxia in said patient.

Group IV, claim(s) 22-23, drawn to a method of detecting a hypoxic tissue, cell or tumor in a patient, comprising administering a labeled compound that modifies a transcriptional response to hypoxia in said patient.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claimed methods are unrelated, each to each other. The subject matter of Group I is not novel in that Arany et al. teach methods of identifying compounds which modulate transcriptional responses to hypoxia by exposing the cell to the compound, inducing hypoxic conditions and measuring the transcriptional response of the cell (See Fig. 3 and p. 12971). Thus the technical feature of the method of identifying compounds that modulate a transcriptional response to hypoxia in cells is not special and the groups are not so linked under PCT Rule 13.1. The additional groups do not share a technical feature in common and, additionally, the claimed methods are directed to different results or use different, distinct, unrelated method steps which do not share the same technical feature.

Application/Control Number: 10/009,584

on/Control Number: 10/0

Art Unit: 1636

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, Ph.D., whose telephone number is (571) 272-0767. The examiner can normally be reached on Monday-Thursday from 8:00 AM - 5:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Irem Yucel, Ph.D., can be reached on (571) 272-0781. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
